

# Tipbook Vocals / eTipbook Vocals

*Tipbook Vocals* is the owner's guide to the most personal instrument – The Singing Voice. It helps you to understand and extend your vocal possibilities, and to appreciate and evaluate input from voice teachers and coaches. A perfect tool for beginners, a source of inspiration for advanced singers in any style - from classical to rap and jazz. Really.

## Includes Audio and Video

*Tipbook Vocals* was written in close collaboration with classical and non-classical singers and teachers, therapists, and other experts. The result is an unbiased, open-minded book that introduces you to singing in tune, breathing techniques, singing loudly without hurting your voice, and a host of other subjects. The book also sheds a light on various singing methods, it explains the concept of registers (and why some experts reject that very concept), and provides dozens of handy tips on voice care, memorizing lyrics, and pronunciation. The interactive audio and video Tipcodes make the main concepts presented in the book come to life.

## Reference Guide

Non-classical singers will appreciate the chapter on microphone selection and technique, while a chapter on reducing stage fright will be helpful for singers in all styles, at all levels. A glossary and an extended index allow you to easily find what you're looking for, turning the book into a handy reference guide.
